The manufacturer is continually working on the further development of all types and models. Please be aware that we reserve the right to make changes to the shape, equipment and technology.

Symbol	Explanation
	Read instructions Please read the information in these instructions carefully to understand all of the benefits of your new appliance.
	Additional information on the Internet The digital manual with additional information and in other languages can be found via the QR code on the front of the manual or by entering the service number at home.liebherr.com/fridge-manuals . The service number can be found on the serial tag:  <i>Fig. Example illustration</i>
	Check appliance Check all parts for transport damage. If you have any complaints, please contact your agent or customer service.

Symbol	Explanation
	Differences These instructions apply to a range of models, so differences are possible. Sections that apply to certain models only are marked with an asterisk (*).
	Instructions and results Instructions are marked with a ►. Results are marked with a ▷.
	Videos Videos about the appliances are available on the YouTube channels of Liebherr-Hausgeräte.

Open source licences:

The appliance contains software components that use open source licences. Information on the open source licences used can be found here: home.liebherr.com/open-source-licences

1 General safety instructions

- Please keep this assembly manual in a safe place so you can refer back to it at any time.
- If you pass the appliance on, please hand this assembly manual to the next user.
- Read this assembly manual carefully before installation and use to ensure safe and correct use of the appliance. Follow the instructions, safety instructions and warning messages included at all times. They are important for ensuring you can operate and install the appliance safely and without any problems.
- First read the general safety instructions in the “General safety instructions” section of the **operating instructions**, which accompany these installation instructions, and follow them. If you cannot find the **operating instructions**, you can download the **operating instructions** from the internet by entering the service number at home.liebherr.com/fridge-manuals. The service number can be found on the serial tag:

- **Observe the warning messages and other detailed information in the other sections when installing the appliance:**

	DANGER	identifies a situation involving direct danger which, if not obviated, may result in death or severe bodily injury.
	WARNING	identifies a dangerous situation which, if not obviated, may result in death or severe bodily injury.
	CAUTION	identifies a dangerous situation which, if not obviated, may result in minor or medium bodily injury.
	NOTICE	identifies a dangerous situation which, if not obviated, may result in damage to property.

	Note	identifies useful instructions and tips.
--	------	--

2 Installation requirements

The installation conditions are crucial to ensure that you can operate your appliance safely, efficiently and without problems.

- Observe all safety instructions.
- Consider the location and position in the room.

WARNING

Danger of fire due to incorrect positioning!

If the mains cable or plug touches the back of the appliance, the vibration can damage the mains cable or the plug resulting in a short circuit.

- ▶ Make sure the mains cable is not trapped under the appliance when you position the appliance.
- ▶ Stand the appliance so that it is not touched by connectors or main cables.
- ▶ Do not connect any appliances to sockets in the area of the back of the appliance.
- ▶ Do **not** place and operate multi-sockets/power distributors and other electronic devices (such as halogen transformers) at the back of the appliances.

WARNING

Fire hazard due to dampness!

If live parts or the mains lead become damp this may cause short circuits.

- ▶ The appliance is designed for use in enclosed areas. Do not operate the appliance outdoors or in areas where it is exposed to splash water or damp conditions.

WARNING

Leaking coolant and oil!

Fire. The coolant contained in the appliance is eco-friendly, but also flammable. The oil contained in the appliance is flammable. Escaping coolant and oil can ignite if the concentration is high enough and in contact with an external heat source.

- ▶ Do not damage the pipelines of the coolant circuit and the compressor.

2.1 Installation site

- Only operate the appliance when it is installed.
- If the appliance is installed in a very damp environment, condensation may form on the appliance exterior. Always make sure there is good ventilation and aeration at the installation site.
- The more refrigerant there is in the appliance, the larger than room must be in which it is located. In rooms that are too small, a leak can produce a flammable gas/air mixture. For every 8 g of refrigerant, the installation room must be at least 1 m³ in size. Information on the refrigerant contained is given on the type plate inside the appliance.
- The floor on which the appliance stands must be horizontal and level.

2.2 Position in space

- Do not install the appliance in direct sunlight or near radiators or similar sources of heat.

- If you install the appliance in a island unit, appliances with an integrated exhaust air system can damage the appliance. Either ensure separate air ducting or install a partition wall between the appliances.
- Use in hazardous areas is not permitted.

3 Appliance dimensions

Fig. 1 Example illustration

- (A) Appliance height including feet
(B) Appliance width
(C) Appliance depth

	U.. 36..A)	U.. 37..A)
A	819 mm	859 mm
B	597 mm	
C	556 mm

- (A) Niche width
(B) Niche depth
(C) Niche height
(H) Ventilation cross-section

Unit front

A	600 mm	
B	min. 560 mm	
C	U.. 36..:A) 820 mm to 880 mm	U.. 37..:A) 860 mm to 920 mm
D	11 mm to 66 mm	
E	100 mm to 160 mm	
F	60 mm to 120 mm	
G	54 mm to 109 mm	
H	150 cm ²	
I	600 mm	
J	40 mm	
K	18 mm	

A) Appliance type designation

5 Unit front

5.1 Unit front weight

NOTICE

A heavy unit door may pose a risk of damage! If the unit door is too heavy, damage to the hinges cannot be ruled out, which may compromise functionality.

► Before fitting the unit door, ensure that the unit door does not exceed the permissible weight.

	Maximum weight of the unit door
Telescopic unit	5 kg

5.2 Unit door

- A door is required for the kitchen unit.
- The door must be at least 16 mm and no more than 19 mm thick.
- There must be a gap of at least 3 mm width between the door and the cupboard door above (if present).
- The width of the unit door depends on the style of the kitchen and the size of the gap between the door panels of the cabinet. In general, a vertical gap of 3 mm should be left between the unit doors.
- If there are other cupboards, the top edge of the unit door should be at the same height as the doors of the neighbouring unit.
- The unit door must be flat and mounted without tension.

NOTICE

A heavy unit door may pose a risk of damage! If the unit door is too heavy, damage to the hinges cannot be ruled out, which may compromise functionality.

► Before fitting the unit door, ensure that the unit door does not exceed the permissible weight.

5.3 Unit front dimensions

Fig. 3

Niche height	.. 37..
A	595 mm
B1	at least 370 mm maximum 386 mm Check for collision with the lower unit door.
B2	At least 370 mm maximum value may not exceed the ventilation cross-section of 150 cm ² .

A) Appliance type designation

6 Transporting the appliance

6.1 Transporting the appliance for initial use

Ensure that the following requirements are met:

- ☐ The appliance is packaged.*
- ☐ The appliance is upright.
- Transport the appliance with the help of two people.*
- Unpacking the appliance. (see 7 Unpacking the appliance)

6.2 Transporting the appliance after initial use

Observe the following instructions if you wish to transport or move the appliance again after initial use.

Ensure that the following requirements are met:

- ☐ The appliance is unpacked.
- ☐ The appliance is emptied.
- ☐ The appliance is upright.
- ☐ The pull-out trolley is secured against accidental opening.

If you want to transport the appliance over a short distance:
If you want to transport the appliance over a greater distance:

► Hold the appliance by the carrying handles.

After transport:

7 Unpacking the appliance

NOTICE

Risk of damage to the floor!

- Protect your floors by covering them before removing packaging from the appliance.

Before you connect the appliance, report any damage immediately to the delivery company.

- Check the appliance and the packaging for damage during transport. Contact the supplier immediately if you suspect any level of damage.
- Remove all materials from the back or the side walls of the appliance that may prevent proper installation or ventilation.
- Remove all protective films from the appliance. Do not use sharp or pointed objects for this.

8 Disposing of packaging

WARNING

Danger of suffocation due to packing material and plastic film!

- Do not allow children to play with packing material.

The packaging is made of recyclable materials:

- corrugated board/cardboard
- expanded polystyrene parts
- polythene bags and sheets
- polypropylene straps
- nailed wooden frame with polyethylene panel*
- Take the packaging material to an official collecting point.

9 Aligning the telescopic unit

If the telescopic unit is not straight, you can align the telescopic unit. This setting is intended exclusively for the event that the telescopic unit no longer closes properly over time. The unit is aligned via the unit front.

- Remove the container.

Fig. 4 Example illustration

- Remove the centre screw.

Fig. 5 Example illustration

- Loosen screws slightly.
- Move telescopic units up or down with mounting bracket.
- Tighten the screws as far as they will go.
- The telescopic unit is aligned.

10 Recessed installation

10.1 Tool

Make sure that the following tools are to hand:

- ☐ Torx® 20
- ☐ Slotted screwdriver
- ☐ Measuring tape
- ☐ Pencil
- ☐ Cord
- ☐ Spirit level

Before installing the appliance in the niche, note the fixing method:

Lateral fixing	Ceiling mounting
Substructure under a hard worktop such as granite	No granite slab
The appliance is lower than the worktop when the adjustable feet are fully extended.	Appliance sits slightly braced under worktop when adjustable feet are fully extended.
Appliance side panel available for screwing.	

10.2 Preparing the appliance

Before installing the appliance in a niche, make sure that the following requirements are met:

- ☐ The door hinge has been hung. You can only change the door hinge from the outside of the niche because you need enough space to do so.

Recessed installation

- ▶ Plug the mains cable's IEC socket completely into the appliance plug on the back of the appliance.
- ▶ Ensure that the IEC socket is tight.
- ▶ Use a cord to lay the mains plug to a freely accessible socket.

Fig. 6

NOTICE

Risk of damage if the appliance is moved!

If you move the appliance, you may damage the floor or the appliance's adjustable feet may break off.

Before moving:

- ▶ Screw in the levelling feet completely.
- ▶ Place a cardboard strip (e.g. packaging) with approx. 100 mm x 600 mm under each of the adjustable feet.

When moving:

- ▶ Move the appliance carefully.
- ▶ For uneven floors: Carefully lift the appliance.

After moving:

- ▶ Remove the cardboard strips.

10.3 Screwing the appliance to the ceiling

Fig. 7 Example illustration

- ▶ Insert the bracket into the opening in the unit ceiling and bend it forwards.

WARNING

Risk of fire due to short circuit!

- ▶ When you push the appliance into the niche: do not kink, jam or damage the mains cable.
- ▶ The appliance must not be operated with a defective mains cable.

- ▶ Slide the appliance into the recess and align, see point (see 10.5 Aligning the appliance) .

10.4 Fixing the appliance on the side

Fig. 8 Example illustration

- ▶ Bend one end of each bracket before installation. Insert the straight side into the opening in the appliance cover and bend it forwards.

WARNING

Risk of fire due to short circuit!

- ▶ When you push the appliance into the niche: do not kink, jam or damage the mains cable.
- ▶ The appliance must not be operated with a defective mains cable.

- ▶ Slide the appliance into the recess and align, see point (see 10.5 Aligning the appliance) .

10.5 Aligning the appliance

Fig. 9 Example illustration

- ▶ Unscrew the levelling feet to below the worktop.
- ▶ Align the appliance in an upright position using a spirit level.

Fig. 10 Example illustration

- ▶ The distance from the front edge of the unit side panel to the appliance body on both sides is $X = 41.5 \text{ mm}$.
- ▶ If there is no unit side panel, orientate on the worktop.
- ▶ **For units with door stop parts (knobs, sealing lips, etc.):**
 - ▶ Subtract the installation dimension (depth of the door stop parts) from the 41,5 mm insertion depth.
 - ▶ Unscrew the levelling feet alternately to the maximum. The maximum adjustment travel is 60 mm.
 - ▶ Appliance is aligned upright
 - ▶ The appliance is slightly braced in the recess between the floor and worktop.

10.6 Fitting the base

Fig. 11 Example illustration

- ▶ Put on the appliance base cover Fig. 11 (2) but do not fix it in place yet.
- ▶ Position the unit door and unit base panel for testing
- ▶ If the base panel is visible Fig. 11 (2), pull it forwards so that the front edge of the ventilation grille and the unit base panel are level.
- or-
- ▶ If the base panel is concealed Fig. 11 (2), push it all the way back.
- ▶ Ensure that the ventilation slots are completely free: If necessary, cut the height of the unit base panel Fig. 11 (U) to size!
- ▶ Adjust the web height Fig. 11 (V) under the appliance base panel Fig. 11 (2) along the niche width Fig. 11 (W).

Fig. 12 Example illustration

- ▶ Fix the appliance base panel: Insert the latch while holding the appliance base panel.
- ▶ Fasten the unit base panel.

10.7 Screwing the appliance into the niche

Ceiling mounting:

Fig. 13 Example illustration

- ▶ For mounting under the worktop, screw on the mounting brackets with two screws each underneath the worktop.

Lateral fixing:

Fig. 14 Example illustration

- ▶ For side mounting, screw the mounting bracket into the niche with one screw on the right and one on the left.

11 Preparation

Unit door:

- ❑ Fit the handle on the unit door; it is not possible to fit it later.
- ❑ To ensure that the telescopic units are pulled out evenly, always fit the handle in the centre of the unit door.

12 Fitting the unit door at the top

Fig. 15 Example illustration

- ▶ Measure the distance Fig. 15 (Y) from the lower edge of the unit front to the retaining bracket.
- ▶ Measure the distance Fig. 15 (S) from the lower edge of the unit front to the upper edge of the unit door.

Fig. 16 Example illustration

Fitting the unit door at the top

- Transfer dimension (Y-S) to unit door.

Fig. 17 Example illustration

- Measure the distance Fig. 17 (X) between the outer edges of the retaining brackets.

Fig. 18 Example illustration

- Transfer dimension to unit door.

Fig. 19 Example illustration

- Detach the retaining bracket.

Fig. 20 Example illustration

- Fit the retaining bracket to the unit door.

Fig. 21 Example illustration

- Fit the unit door on the telescopic unit.

Fig. 22 Example illustration

- Align the door using different screw positions by moving the screws from the centre to the lower or upper position.
- Unit door fitted at the top.

13 Fitting the unit door at the bottom

Fig. 23 Example illustration

- Measure the distance Fig. 23 (Y) from the lower edge of the unit door to the retaining bracket.

Fig. 24 Example illustration

- Transfer dimension (Y-S) to unit door.

Fig. 25 Example illustration

- Measure the distance Fig. 25 (X) between the outer edges of the retaining brackets.

Fig. 26 Example illustration

- Transfer dimension to unit door.

Fitting the unit door at the bottom

Fig. 27 Example illustration

- Detach the retaining bracket.

Fig. 28 Example illustration

- Fit the retaining bracket to the unit door.

Fig. 29 Example illustration

- Fit the unit door on the telescopic unit.

Fig. 30 Example illustration

- Align the door using different screw positions by moving the screws from the centre to the lower or upper position.
- Unit door fitted at the bottom.

14 Connecting the appliance to the power supply

WARNING

Danger of electric shock and injury due to damaged appliance or damaged mains cable!

Danger of cuts and fatal injuries. If the appliance or the mains cable is damaged during transport, you may be electrocuted. You could also cut yourself on damaged parts of the appliance housing.

- ▶ Check the appliance and the mains cable for damage after transport.
- ▶ Never put the appliance into operation if the appliance or the mains cable are damaged.
- ▶ Contact Customer Service.

You can connect your appliance to the mains using the power cable supplied separately. The mains power cable has an appliance coupler at one end and a mains plug at the other end.

Make sure that the following requirements are fulfilled:

- The appliance and power cable are undamaged.
- The appliance is installed in accordance with the regulations. (see 10 Recessed installation)
- Requirements for the electrical connection are met.
- Dimensions for connection in accordance with regulations are known and observed.
- Mains voltage and frequency correspond to the specifications on the type plate.
- The socket is earthed according to the regulations and fused.
- The fuse tripping current is between 10 A and 16 A.

NOTICE

Danger of damage to incorrect operation!

Damage to the electrical components of the appliance.

- ▶ Only use the supplied mains cable.

WARNING

Danger of fire due to incorrect connection!

Burns.

Damage to the appliance.

- ▶ Do not use an extension cable.
- ▶ Do not use distributor blocks.

NOTICE

Danger of damage to incorrect connection!

Damage to the appliance.

- ▶ Do not connect the appliance to a stand-alone inverter, e.g. solar power systems and petrol generators.
- ▶ Connect the mains cable plug to the power supply. Ensure that the plug is tightly in the socket.
- ▶ If no action occurs within 60 seconds: The standby symbol fades or disappears.*
- ▶ The appliance is connected. For information regarding first use, see the following section or the operating instructions.
